German - Basic

Education

MSc - User Experience Design

2018 - Kingston University, London

BA - Web Design

2016 - Epitech Digital, Paris

Experience

Cognizant | Senior Interaction Designer

November 2023 - Present

- Owned end-to-end interaction design for government services (DEFRA, HMRC), translating research into actionable prototypes and design decisions.
- Guided usability testing, supporting researchers to gather, analyse, and act on user feedback to improve designs.
- Defined personas, user journeys, and interaction models, ensuring alignment with GDS standards and design system principles.
- Championed accessibility and quality, implementing WCAG 2.2 compliance across all designs.
- Influenced cross-functional teams, helping designers, researchers, and developers deliver user-centred solutions.

DAM Digital | Senior UX/UI Designer

April 2022 - November 2023

- Led interaction design for clients including McArthurGlen and Crisis, balancing user needs with business goals.
- Owned end-to-end design processes, collaborating closely with developers, UI designers, and PMs using JIRA and Confluence.
- Crafted user journeys, wireframes, and prototypes in Figma, Miro, and Whimsical, refining solutions based on client feedback.
- Ensured accessibility and adherence to design system principles across projects.

Methods | UX Designer

February 2019 - April 2022

- Initiated interaction design contributions to government projects including Every Mind Matters, National Funding Formula, and Ministry of Defence initiatives.
- Developed personas, user journeys, and GDS-compliant prototypes in Figma, translating research into actionable designs.
- Facilitated workshops bridging research, development, and product teams to deliver user-centred solutions.
- Coordinated project requirements and design implementation using JIRA, Trello, Teams, and Miro.

Société Générale Design | UX/UI Trainee

September 2017 – December 2018

- Delivered prototypes for trading platforms, internal incubators, and social initiatives, iterating on both low- and high-fidelity designs.
- Organised co-creation workshops with Product Owners, end users, and IT teams.
- Crafted interactive designs using Adobe XD and Sketch, supporting iterative design and testing cycles.
